

Project Design Phase-II

Data Flow Diagram & User Stories

Date	5 September 2026
Team ID	Individual
Name	Puli Jagadeesh
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	4 Marks

Data Flow Diagrams:

DFD Level 0 – Software Installation Request Automation

Source / Actor	Process / System	Data Flow	ServiceNow Table / Record	Output / Next Step
Employee / Requestor	Service Catalog	Software name, reason, employee details	sc_req_item (RITM)	Software request created
Service Catalog	Request Processing	Request details	sc_request (REQ)	Request and RITM linked
Request Processing	Approval	Request requiring authorization	sysapproval_approver	Manager / authorized approver reviews
Approver	Approval	Approve / Reject decision	sysapproval_approver	Approved request proceeds / rejected request stops
Approval	Fulfillment	Approved request	sc_task (SCTASK)	Catalog Task created for IT / Software Team
IT / Software Team	Fulfillment	Installation task and software details	sc_task (SCTASK)	Software installed and task completed

Data Flow Summary:

Employee → Service Catalog → REQ/RITM creation → Approval → Catalog Task (SCTASK) → IT/Software Team fulfillment → Software installation completed.

User Stories

The following user stories define the functional requirements for the Software Installation Request Automation project.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee (Requestor)	Service Catalog Request	USN-1		A request is created with the required software and employee details.	High	Sprint-1
Employee (Requestor)	Service Catalog Request	USN-2		Required fields are completed and the request can be submitted successfully.	High	Sprint-1
Approver	Approval	USN-3	As an approver, I can review and approve or reject a software installation request.	The request follows the approval decision and does not proceed to fulfillment when rejected.	High	Sprint-1
System / ServiceNow	Workflow Automation	USN-4	As the system, I can automatically route the submitted software request for approval.	The configured workflow starts after request submission and sends the request to the appropriate approver.	High	Sprint-1
IT / Software Team	Fulfillment	USN-5	As an IT team member, I can receive a Catalog Task for an approved software installation request.	An SCTASK is created and assigned to the appropriate IT / Software team after approval.	High	Sprint-1
IT / Software Team	Fulfillment	USN-6	As an IT team member, I can complete the software installation task and update its status.	The task can be updated and marked complete after the software is installed.	High	Sprint-2
Employee (Requestor)	Request Tracking	USN-7	As an employee, I can track the status of my software installation request.	The employee can view whether the request is submitted, awaiting approval, approved, or completed.	Medium	Sprint-2
Employee (Requestor)	Notifications	USN-8	As an employee, I can receive notifications about important request status changes.	Notifications are triggered for relevant submission, approval, rejection, and completion events.	Medium	Sprint-2
